

Mehdi OUBARA

Software & Network Engineer | Back-End & Networking Specialist

oubara.mehdi@gmail.com — +212 657-162581 — [LinkedIn](#)

Back-end software engineer with experience in REST APIs, automation, and network infrastructure, across contexts ranging from blockchain (Web3) to SaaS platforms. Comfortable across the full development cycle, from architecture design to cloud deployment.

PROFESSIONAL EXPERIENCE

The Flex

Remote (Freelance Contract)

Software Engineer – Base360.ai Project

Aug. 1 - Sept. 7, 2026

- Developed an automation module for Base360.ai, The Flex's proprietary platform, targeting booking synchronization and automated guest communication.
- Designed a back-end service (Python, FastAPI) exposing REST APIs to connect the module to internal pricing and booking-management systems.
- Integrated third-party services (Stripe, Twilio, OpenAI) to automate tasks previously handled manually.
- Set up module deployment via Docker and GitHub Actions within an existing AWS infrastructure.

Taliware

San Diego, California, USA

Web3 & Back-End Engineer

Apr. 2024 - Apr. 2026

- Developed a Web3 API and subscriptions framework enabling secure blockchain integration and token payments as part of a 4-engineer team.
- Designed the database architecture for **Cordoba L2**, enabling real-time queries for distributed blockchain applications.
- Built and optimized the CordobaPhoto back-end API, unifying four data sources, speeding up partner integration by 35% and increasing API usage by 50%.

Cloud Marketing Hub

Tangier, Morocco

Software Developer

Nov. 2022 - Apr. 2024

- Developed automation solutions in Python, Java, and JavaScript within teams of 20 to 40 members, reducing manual tasks.
- Built front-end web interfaces and secure REST APIs for scalable marketing automation systems.
- Developed automation scripts enabling real-time data synchronization across multiple platforms.
- Improved data throughput by **60%** through API and SQL query optimization.
- Automated internal reporting, increasing team productivity by **20%** through daily reports and proactive error detection.

EDUCATION

École Marocaine des Sciences de l'Ingénieur (EMSI)

Tangier, Morocco

Engineering Degree in Software & Network Engineering

Graduated June 2026

Institut Spécialisé de Technologie Appliquée

Taza, Morocco

Specialized Technician in Computer Development

Sept. 2020 - June 2022

PROJECTS

Network Monitoring & Security Solution

Network security infrastructure with a VueJS dashboard, a .NET inspection service, and a Django REST API with authentication. *Stack: Vue.js, .NET, Django, REST*

Multimodal RAG System

RAG architecture with vector embeddings and a data retrieval pipeline. *Stack: Python, vector embeddings, LLM*

Resume Optimization Platform

LLM-based ATS platform for automatic resume personalization. *Stack: Python, LLM APIs*

Cybersecurity Training Environment

Development of a CTF platform with self-healing infrastructure, real-time scoring, and an analytics dashboard. *Stack: Docker, automation scripts, analytics dashboard*

Network Infrastructure Design

GNS3 topology with Active Directory, MySQL replication, and VMware virtualization for high availability. *Stack: GNS3, Active Directory, MySQL, VMware*

TECHNICAL SKILLS

Languages: Python, Java, C#, C++, Go, PHP, TypeScript, JavaScript

Frameworks: .NET, Laravel, Django, FastAPI, Node.js, Vue.js, React.js, Nuxt.js

Databases: PostgreSQL, MongoDB, MySQL, MariaDB

Tools & Cloud: Docker, Azure, Oracle Cloud, GNS3, Cisco Packet Tracer, WebSocket

CERTIFICATIONS

- **Advanced Styling with Responsive Design** – University of Michigan
- **The Unix Workbench** – Johns Hopkins University
- **Software Engineering: Software Design and Project Management** – HKUST
- **Virtual Networks in Azure** – Whizlabs

LANGUAGES

English: B2 **French:** B1 **Arabic:** Native language
